

Town of Elk Mound Special Town Board Meeting Minutes June 16, 2020

Special Town Board meeting called to order by Chairman Christopherson. Supervisors Michels and Klemp, along with Corey Tietz were in attendance.

Discussion was had concerning which roads the Town would repair with this year's anticipated budget.

All participants traveled to view 740th, 830th, 863rd, 867th, 870th, 890th south of 530th, and 620th.

Special consideration was given to 740th because the Town is eligible for LRIP funds to defray the costs of repair on that road and we do not want to let that eligibility lapse. Additional discussion raised by Chairman Christopherson on whether to add an additional culvert under 740th was had.

Motions were made by Supervisor Klemp and seconded by Supervisor Michels to put out bids for 740th, 1109 feet, with 6 inches of base, shoulders, rip rap, and 3 inches hot asphalt on top. This may be done with advance bid visit invitations. Chairman Christopherson will check with the County whether shale shoulders/base will be acceptable for the state to approve LRIP compliance. Thereafter, the Town will follow up with Brent Wachsmuth and Scott Construction to finish road repairs on 863rd, 867th, and 870th. Each project is estimated to cost the Town about \$30,000.00, with part of the work being done by Wachsmuth and less than \$25,000 being done by other contractors. Thereafter, depending on budget remaining, we will seek bids to place a cold mix overlay on 890th, beginning south of 530th, as far as budget will allow. These motions were approved unanimously.

The Town is concerned about 830th and 620th, hoping to have sufficient budget to get to those roads in the near future.
